

The Water Department Needs Your Help!

The Wisconsin DNR and Public Service Commission (PSC) are requiring all municipal water systems to complete a system wide inventory of all water services. You can help by self-reporting the service information for your residence.

- A) 7 question survey: combinedlocks.wi.gov/water-sewer.
- B) Schedule an appointment to have one of our village employees stop by and record your service information. (920 788-7740)

The items that we need to record include:

- Meter serial number
- Water line material and size entering the house
- Water line material throughout the house
- Whether there is a water softener or filter system in the house

Below are examples of what you would need to look for:
